To Whom It May Concern:

Our company contacted Advanced Modular October 28, 2009 with a need for two security buildings to be constructed at foreign ports (St Thomas USVI and Nassau Bahamas). The following day we completed plans, specifications and a contract which was approved Friday October 30th.

Advanced Modular's team approach to solving problems was instrumental in the timely and very successful completion of our projects. Both of these buildings were manufactured, transported on the ocean and constructed at the ports ready for occupancy by December 11, 2009.

During this forty two day time period Advanced Modular sourced and installed many site related items including generator / electric service, water connections, waste tanks and handicap ramps for building access. Advanced Modular Structures, Inc. staff was very professional and easy to work with. If you have a need for their product we offer our highest recommendation.

If you wish to contact me for more specific information, I may be contacted at FLewis-Turner@Celebrity.com

Sincerely,
